1 Color in Text and Headings

1.1 HorizontalLine

This chapter is for testing text color extractions of the parser

Paragraph text is blue

1.2 HorizontalBox

This Textline is completely colored but is just a long text so therefore the box returned by the parser contains more than one line with the same color for each line so the box itself should return the color information.

1.2.1 Words

This line has no color cause line color changes in the words, but the words still have

This words have no color cause not all characters have the same color.

These words are printed in colors but with yellow background

2 Styled Text

This is printed in **bold** text format.

This is printed in *italic* text format.

This is printed in <u>underline</u> text format.
